TOOLS

n8n · Claude · Groq · Gmail · Google Sheets · Telegram · WhatsApp · Notion · Razorpay · JavaScript · Docker · Railway · Vercel

AVAILABLE FOR

- Fixed-scope automation builds
- Fixing or rebuilding n8n workflows
- Websites for local businesses

Workflow files for six of my systems are public on GitHub. Read them before you hire me.

Samhita Tavutu

FREELANCE AI AUTOMATION ENGINEER

> I build AI systems that capture enquiries, follow up automatically and book customers, so businesses stop losing leads to slow replies. Every system keeps a person in control: nothing goes out under your name until you approve it.

WHAT I BUILD

Outreach and leads
Find prospects, draft personal emails, follow up, track replies.

Bookings and follow-up
Capture enquiries, confirm bookings, chase the ones that go quiet.

Inbox and support
Sort messages, draft replies, alert you when a human is needed.

Local business websites
Fast, animated sites that look credible online.

Document review
Contracts checked against your playbook, scored, routed for approval.

Content workflows
One video becomes posts, summaries and notes.

EXPERIENCE

Freelance AI Automation Engineer — Remote

Edit Theory · Founder

- Built eight complete systems for D2C brands and local businesses, led by lead follow-up, outreach and booking automation. Each is documented with engineering notes.
- Designed human approval into every system that sends email or messages.
- Build for hand-off: your own accounts and API keys, one settings block per workflow, plain-English naming.

Freelance Automation Engineer — Chennai pilot

Verified Home Tuition Marketplace

- Building the backend (WhatsApp, Google Sheets, Razorpay, Google Meet) and the frontend for parent and tutor flows.

SELECTED PROJECTS

Restaurant Outreach LEAD FOLLOW-UP
Audits a restaurant's website, finds what's wrong, and drafts a pitch from the real problems. Review, sending, reply tracking and instant alerts included.

Booking Assistant BOOKINGS
Customers search, book and watch a live confirmation. Web frontend, automated backend, logging and email. The venue-confirmation step is a labelled demo, with real integrations built and ready.

Cold Email and Lead Systems OUTREACH
Finds and scores leads, writes personal openers, follows up on a schedule and tracks replies.

Society Complaint Agent OPERATIONS
Residents report issues in a chat bot. Complaints are ticketed, the secretary approves vendor dispatch, and residents are told when it's fixed.

Concept Websites DESIGN
Eleven working demo sites across restaurants, salons, travel, healthcare, gyms and more.
